

Home Network Connection

- To connect to your home Wireless Internet tap Settings on the desktop –

- Tap Wi-Fi
- Choose a your home network
- Depending on the Wi-Fi network, it may be necessary to enter a password.
- When connected to a Wi-Fi network, the Wi-Fi icon  in the status bar displays connection strength. The more bars you see, the stronger the connection.

Occasionally while using your iPad, you may have difficulty connecting to the Wi-Fi. Follow these steps to troubleshoot this problem -

1. Be sure that you are in range of your Wi-Fi router (access point).
 2. Tap Settings > Wi-Fi and turn Wi-Fi off and then on again.
 3. Confirm that your Wi-Fi router and Cable or DSL modem are on.
 4. Restart your iPad.
- Tap Settings > Wi-Fi and locate the Wi-Fi network to which you are connected. Then tap forget this Network. Try to connect to your Wi-Fi network again.

Note: You will need to enter your Wi-Fi password again if your network requires one.
